

## Evidence-Based Medicine Guidelines

Extensive and easy-to-use collection of concise clinical guidelines and supplementary materials for the point of care

## **EBM Guidelines brings evidence to practice.**

EBM Guidelines is a unique collection of high-quality clinical guidelines for primary care, combining robust clinical experience with the best available evidence. The continuously updated EBM Guidelines follows the latest developments in clinical medicine and brings evidence into practice. The collection is an indispensable source of practical information for primary care.

In addition to the English-language product, versions adapted to local practice and language are available in Austria, Azerbaijan, Belgium, Estonia, Finland, France, Germany, Italy, Russia, Switzerland, and Ukraine.

## EBM Guidelines contents

- Almost 1,000 concise primary care practice guidelines covering a wide range of medical conditions. Both diagnoses and treatment descriptions are included.
- A library of some 1,500 high-quality images of all common and many rare dermatological conditions, electrocardiograms and eye pictures.

*"The French version of the EBMG has found loyal users in the primary care. A large base of French GPs has now added the EBMG online service to the traditional medical resources, and the number of users increases day by day. It has been reliable, current and trustworthy. I consult it frequently, including with the students I train."*

**Dr Pascal Charbonnel**  
General Practitioner at Les Ulis  
(Essonne, France)

2017–2019 Vice Chairman of  
Collège de la Médecine Générale

2019–2021 Manager of [ebmfrance.net](http://ebmfrance.net)

*"The German version of the EBMG has been an indispensable tool for practising physicians in Austria, Germany and Switzerland. But it has also served well the growing number of medical students and interns. The content is well curated, and the service is easy to use. I use it happily."*

**Dr Susanne Rabadý**

Karl Landsteiner University of  
Health Sciences, Department of  
General Health Studies, Head of  
the Division for General and  
Family Medicine

Vice President of Austrian Society  
for General Practice and Family  
Medicine (OEGAM)

- Over 4,000 high-quality evidence summaries supporting the given recommendations – a specific feature of the guidelines is the use of evidence codes (graded from A where strong evidence exists and further research is unlikely to change the conclusion to D where the evidence is weak and the estimate of effect is uncertain)

EBM Guidelines is published by Duodecim Publishing Company Ltd, a company fully owned by the largest scientific medical society in the Nordic countries, the Finnish Medical Society Duodecim. The Society has over 20,000 physician members. The EBM Guidelines employ state-of-the-art methodologies and sources of evidence-based medicine, such as those of the GRADE working group and the Cochrane Collaboration®.

In its country of origin, Finland, the EBM Guidelines is a standard tool of almost every GP and many specialists.
